INDEX

TO

VOLUME II.—MDCCCXXXII—XXXIII.

Abdomen, penetration of, by a ramrod, 147; discharge of alvine concretions through the parietes of, 171; crushing of, 540.
Aberdeen, medical reform meeting at, 355.
Abortion, notice of Dr. Granville's work on, 286.
Abscess and enlargement of the tongue, 235; lumbar, 642; in the loins, after injury to the kidney, 795; of the leg, 800.
Absorption of the testicle, 669.
Achor, description of, 495.
Acid, benzoic, radical of, 126; iodic, papers on the preparation of, 205, 305, 508, 555; prussic, Dr. Lanyon on the administration of, 74; prussic, on chlorine as an antidote to, 10; prussic, production of death by, 243; prussic, unintentional administration of, 257; prussic, in sea-sickness, 538; prussic, Mr. Laming on, 623; prussic, Dr. Epps on, 699.
Acetabulum, fracture of, 671.
Achroma, nature of, 568.
Acrodynia, Andral on the epidemic so called, 35; again at Paris, 37; Alibert on, 646.
Adams, Mr. J., letter from, 826.
Adulteration of mustard, 127.
Air passages, on foreign growths and bodies in, 97.
Aischrodes, Baron Alibert on, 527.
Ala nasi, formation of a new one, 385.
Alexander, Mr., sketch of, as an oculist, 750.
Albinism, theory and causes of, 429, 523.
Albumen in the urine, 462.
Alcock, Mr., death of, 740.
Aldersgate-Street Dispensary, remarks on elections at, 477; resignation of the medical officers at, 790, 821.
Alibert, Baron, Dr. Paget's essay on his method of classifying cutaneous diseases, 267, 303, 490, 524, 566.
——— lectures by, on some diseases of the skin; remarks by, on the classification of skin diseases, 613.
——— on eczematous dermatoses, 614.
——— on the elementary phenomena of cutaneous eczemation, 613.
——— on erythema and its species, 645.
Alibert, Baron, on spontaneous erythema, 646.
——— on epidemic erythema, 646.
——— on endemic erythema, 647.
——— on erythema intertrigo, 648.
——— on erythema paratrima, 648.
——— on erythema pernio, 677.
——— on erythema by adustion, 677.
——— on the etiology of erythema, 678.
——— on the treatment of erythema, 679.
——— on erysipelas and its species, 741.
——— on simple erysipelas, 742.
——— on phlegmonous erysipelas, 743.
——— on œdematous erysipelas, 773.
——— on the etiology and treatment of erysipelas, 774.
Amenorrhœa, on strychnine in, 76.
America, state of the profession in, 315.
Amputation of finger followed by erysipelas of hand, 385; of the finger, 587; of the forearm, 587; of the arm and thigh, 588; of the toes, 589; of the leg at the knee-joint, 590; of the thigh at the hip, 590.
Amputations, Baron Dupuytren on, 581; Mr. Wardrop on (*see* Wardrop, Mr.)
Anatomy act, proposal to remedy, 84; abandonment of the projected amendments in, 185; payment of expenses of by a tax on students, 196; abandonment of the tax, 780.
Anderson, Mr. W. C., on saline venous injections in cholera, 111.
Andral, M., lectures by, on medical pathology (continued), 1.
——— on vague nervous pains of the head, 2.
——— on migraine, 2.
——— on clavus hystericus, 33.
——— on cephalalgia, 33.
——— on rachialgia, 33.
——— on angina pectoris, 34.
——— on the Parisian epidemic, 34.
——— on acrodynia, 35.

Andral, M. on convulsions, 36.
——— on the causes, varieties, and pathology of epilepsy, 65.
——— on the recurrence and treatment of epilepsy, 102.
——— on specific remedies in epilepsy, 104.
Aneurysm, of the aorta, 63; aortic, singular case of, 666; fatal, of the basilar artery, 397; carotid, case of, 421; inguinal, ligature of external iliac for, 387, 658; inguinal, operation for, at Bristol, 566; gluteal, ligature of the iliac artery for, 739; Dupuytren on the ligature of some chief arteries for, 805.
Angina, guttural, successfully treated by tracheotomy, 101; pectoris, Andral on, 34.
Ani, prolapsus, Dupuytren on, 133.
Animal magnetism, review of the report of the French commissioners of inquiry into, 175, 205.
Animalcule in a child's eye, case of, 5; progress and removal of, 817.
Animals, domestic, on cholera in, 138.
Anthrax, Baron Dupuytren on, 297.
Anus, artificial, following an operation for hernia, 234; Dupuytren's cure of, with the enterotome, 261; first case of, treated in England on Dupuytren's method, 810.
Aorta, aneurysm of, 63; aneurysm of the arch of, 666; abdominal, ligature of, 490.
Apoplexia traumatica from severe injury, 92.
Apothecaries Act, petitions against, 85, 121; necessity of union for its total repeal, 121; remarks on the repeal of, 193; condensation of the clauses of, 351; cannot be a final measure, 373; grievances originating in, 375.
Apothecaries Act amendment bill, copy of, 351; memorial of the Company against, 247, 256; remarks on the second reading of, 410; combination of the Hall and College against, 442; reference of, to a committee, 443; meeting at Bath respecting, 447; deputation from the London College of Medicine to Mr. Lamb on, 475; intention and conduct of the committee on, 484, 502; Dr. Lewins' remarks on, 509.
Apothecaries Company *versus* Collins, decision of the Judges on, 120; remarks on the income of, 124; insulting conduct of to surgeons, 285.
Apprenticeships, medical, disadvantages of, 91; Mr. Eachus on, 259.
Arm, dislocation of, reduced by Malgaigne's method, 31; Dupuytren on amputations of, 587; on amputation of, at the shoulder joint, 588; perforation of, 640.
Arm, fore, Velpeau on the arteries of, 549.
Arm and hand, erysipelas of, 385.
Army, medical officers, claims of, 356.
Army medical board, notice of, 836.
Arsenic, presence of, in test tubes, 376; in cancerous diseases, Dupuytren on, 686.
Arsenic and cholera, deaths from, 231.
Arteries, situation and ligature of, Velpeau on. (*Vide* Velpeau.) Dupuytren on securing, in amputations, 616, 617; of the ear, aneurysmatic dilatation of, 166; ossification of, 747; Dupuytren on the ligature of some for aneurysms, 805.
Arteritis, cases of, 745, 747.
Assault at the College, in 1831, effects of on its funds, 698.
Atmosphere, influence of on operations, 594.
Auscultation in pregnancy, on, 715.
Authors of books reviewed (*see* Reviews).
Axillary artery, Velpeau on the ligature of, 551; false consecutive aneurysm of, 807.
Aylesbury Infirmary, insulting appointment at, 603, 606, 820.
Azote, existence of in rice, 186.

B.

Babington, Dr., death of, and proposed monument to, 186, 218, 349.
Badham, Professor, remarks on, 91.
Baird, Dr., remarks on the proceedings against at Liverpool, 504, 533, 761.
Basilar artery, aneurysm of, 397.
Bat-Club, first general meeting of, for 1833, 54; absence of Sir Astley Cooper from, 95.
Bathing, hot, of the feet, good effects of, 273.
Batten, Mr. W., on phosphorus in cholera, 694.
Bayonet-wounds, rarity of, 147.
Bedingfield, Mr. J., on a case of monstrosity, 499; on the trigger percussor, 769.
Bell, Sir Charles, his theory of the nervous system, 323; portrait and biographical sketch of, with an account of his discoveries, 756.
Bene, Mr. C., on the extraction of teeth, 236.
Benzoyle, discovery of, 126.
Biggs, Mr., note from, 820.
Biographies, The Lancet Medical, introductory notice of, 16; hint to the readers of The Lancet respecting, 32.
Biography of Sir William Blizard, 17; of Clot-Bey, 88; of Mr. Lynn, 156; of Dr. Elliotson, 341; of Sir Charles Bell, 756.
Bird, Mr. H., on elaterium in rheumatism, 48; on malignant cholera, 753.
Birmingham School of Medicine, distribution of prizes at, 417.
Birtwhistle, Mr. J., on an infirmary appointment at Aylesbury, 606; on the London Hospital School, 675, 708.
Bistoury, mode of using, 471.
Black death, account of, 151.
Bladder, disease of, 94, 512; and abdomen, absence of anterior parietes of, 280, 797; of the male and female, difference in the size of, 254.

Bleeding, in the paroxysms of headach, 302; tremendous, specimen of, 542; from wounds in operations, effects of, 649; arrest of senile gangrene by, 748.
Blizard, Sir W., portrait and memoir of, 17, 95; imbecility of, in the hospital, 382; jokes by, 771.
Blood, arterial on free carbon in, 72, 233; analysis of, in phthisis pulmonalis, 72; in purpura hæmorrhagica, state of, 192; circulation of, in insects, 231; and in the fœtus, 56, 313; change of colour of in the lungs, 363; examination of, after venesection, 462; flow of, from the bladder, 512; effused, reabsorption of, 673.
Bloomfield, Mr. H., on the trigger percussor, 794.
Blundell, Dr. E. S., cure of gout by, with the mineral magnet, 459; cure of the douloureux by, 693.
Bodington, Mr. G., case of dislocation of the shoulder by, 155.
Books, reviewed. (*See* end of Nos.)
Bone, diseased, removal of, 451; scrofulous caries of, 40; union of, after fracture, 327. (*See* Patella.)
Boston, establishment of a Phrenological Society in, 409.
Botany, review of treatises on, 344.
Boultbee, Mr. H., letter by, on the Sheffield Infirmary, 628.
Bowels, mechanical obstruction of, 249; effects of recent adhesions of, 249, 381.
Bowerbank, Mr. J., on the circulation in insects, 231.
Boyer, Baron, purentage of, 16.
Brachial artery, Velpeau on the ligature of, 551.
Brachio-cephalic artery, Velpeau on the ligature of, 554.
Bradley, Mr. C., on the power of ergot of rye, 599.
Brain, effects of injury to, considered phrenologically, 330; examination of, 462.
Bread, researches into the chemistry of, 126; arsenic in, 298.
Breast, fungus hæmatodes of, 197; doubtful tumour of, 320; scirrhous, 521, 668; enormous enlargement of, 653.
Breathing, theory of, 334, 359.
Bright, Mr., on the ergot of rye, 388.
Bristol Infirmary, ligature of the external iliac at, 387; meeting of the Provincial Med. Association at, 572.
Brodie, Mr., evidence of, in the case of Cooper v. Wakley, 478; clinical remarks by, viz:—On cut throat and tracheotomy, 32; tumour of the gum, 94; diseased spine and paralysis of lower extremities, 318; counter irritation in disease of the lungs, 319; fracture of the patella, 319; rachitis and mollities ossium, 320; diseased breast, 320; cutaneous diseases, 320; the pulse, 320; quinine in large doses, 320; burns, 320; malignant disease of the penis, 321; ulcer of the face, 321; diseased cervical vertebræ, 321; on the use of iodine in the treatment of tumours; on half vision; on thickening of the mucous membrane of the urethra; on fatty tumours, 450; on florid countenances; on disease of the humerus; on the straining of nerves; on partial paralysis; on injury to the head, 451; on phrenology; on diseased hip and knee, 452.
Brookes, Joshua, reminiscences of, 722.
Brown, Mr. J., removal by, of an aneurysmal tumour of the tongue, 9.
Browne, Mr. W. A. F., on derangements of the faculty of language, 330.
Bryan, Mr. E. L., on the sounds of the heart, 780.
Burke, Mr. L., letter of respecting some alleged phrenological discoveries by, 661.
Burns, use of chloride of soda in, 45; remarks on, 320; Baron Alibert on, 681; Mr. Gower on, 718; treatment of at the Westminster Hospital, 802.

C.

Calculi in the bladder. (*See* Lithotomy, Lithotrity, and Lithotripsy.)
Calculus, expulsion of one from the nasal fossæ, 33.
Calder, Mr. P. W. G., case by, of artificial anus, 234.
Caldwell, Dr. H. S., on iodine in hydrocephalus, 783.
Callus, and its deformities, Baron Dupuytren on, 327.
Calvert, Dr. J. M., on the self-supporting dispensary system, 793.
Cancer, on operations for, 318; Young's treatment of, 611; on arsenical remedies in, 668. (*See* Breast.)
Cancrodes, its position in Alibert's system, 525.
Carbonate of iron, benefit of in chorea, 752.
Carbonic acid gas, alleged cure of glanders by fumigation with, 136.
Carbunculus, description of, 493.
Carcinoma, case of, 768.
Carcinus, description of, 525.
Caries of the bones successfully treated after 17 years' standing, 40.
Carlisle, Sir A., scribblings of, 836.
Carotid artery, ligature of, 166; aneurysm of, treated by ligature on the distal side, 421; Velpeau on the ligature of, 553.
Carrick, Dr., address of to the Prov. Med. Assoc., 607.
Cataract, operation for, 511, 611.
Catarrh, epidemic, remarks on, 200.
Caustics, the treatment of erectile tumours with, 168.
Cautery, the actual, in hemorrhage, 616.
Cephalalgia, M. Andral on, 1, 33.
Cerebellum, destruction of the right lobe of, by a serous cyst, 170.

Cerebrum, faculty of language deranged from injury to, 330.
Certificates, French, recognition of, at the Navy Board, 580; Sir Astley Cooper's, one of, 791.
Charbon, Baron Dupuytren on, 297.
Charities, medical, abuses in, 637, 789, 821.
Chavasse, Mr. H. P., case of acute laryngitis by, 565.
Cheeks, congenital fissure of, 531.
Chelsea Botanical Garden, bad regulations of, 292.
Chemistry, hint to ambitious students of, 125; employment of in medico-legal investigations, 244, 377.
Chemosis, inflammatory, diagnosis of, 733.
Chest, crushing of, 541.
Child, one with twelve toes, 673.
Childbearing, intervals between, 45.
Child, acephalous, union of, to a well-formed one, 620, 732; overworking of in factories, 220.
Chlorine, as an antidote to prussic acid, 110.
Chloride of soda, use of in burns and black eyes, 45.
Cholera, malignant, medals, distribution of, in Paris, 23; results of the treatment of, 111, 302; on saline venous injections in, 111, 657; Dr. Wright on the cause of, 112; derivation of the word, 119; in domestic animals, 138; in America, 249; at Oporto, 300; Dr. J. Weatherill on, 388; re-appearance of, in Paris, 444; re-appearance of, in London, 484; re-appearance of, at Sunderland, 516; hygeienic measures against, 534; suggestion for obtaining abundant attendance in, 606; pathology of, 626; mistake respecting, at the London Hospital, 639; anti-stimulant treatment of, 656; venous injection with mercury in, 657; treatment of, with phosphorus, 694, 755; case of, at St. George's, 699; cold water and calomel in, 719, 753; cases simulating, 721; prevention bill, re-enaction of, 695; pauper patients, non-remuneration for attending, 763; and arsenic, deaths from, 281; medals of, at Paris, 87; sulphate of iron in, 816.
Chorea, on carbonate of iron in, 752.
Circumflex artery, ligature of, 488.
Clanny, Dr. W. R., on the blood in phthisis pulmonalis, and free carbon in the blood, 72, 233.
Clavus, description of, 494.
Clavus hystericus, M. Andral on, 33.
Clendinning, Dr. J., on the Westminster Hospital clinical clerkship, 787.
Clinics, foreign, superiority of, 770.
Close, Mr. A. W., on iodine, 818.
Clot Bey's mode of performing lithotomy, 6; portrait and biographical sketch of, 88.
Cnidosis, description of, 492.
Codeine, on the mode of action of, 127.
Coffee-drinking, debate on the effects of, 47; Mr. Cole on the ill effects of, 274.
Colchester, inquest at, 339.
Cole, Mr. J., on the deleterious effects of tea and coffee, 274.
Coley, Mr. J. M., case by, of retention of urine from imperforate hymen, 396.
College of Medicine, the London, deputation from, to Mr. Lamb, 475; Mr. Brookes's junction with, 722.
College of Surgeons, London, the Royal, Mr. Keate's history of the proceedings of, 57; complaint from the library of, 119; conduct of, respecting lost diplomas, 64, 144; emoluments of, 225; requisition to the council of, 248: dusty state of the museum of, 404; efforts of, against the Apothecaries' Act amendment bill, 442; order of the House of Commons to, 443; Mr. Lamb's opinion of, 476; returns from, to Parliament, 697; anecdote of examinations at, 771.
College of Physicians, evening meetings at, 15, 307; order of the House of Commons to, 443; Harveian oration at, 452; copy of the regulations and by-laws of, 631; table of the number of fellows and licentiates admitted at since 1771, with its cash accounts, 635; remarks on reform of, 637; petition of London licentiates against, 630; meeting extraordinary at, against reform, 535.
Collins, Dr., Apothecaries Company *versus*, 120.
Concours for filling the Parisian chair of clinical medicine, proceedings and abuses of, 23, 87, 243, 282; emendation of, 532; for filling the chair of external pathology, 732; public meeting in England to petition for, 255.
Concretions, alvine, discharged through the abdominal parietes, 171.
Confectionary, poisoned, 280.
Congestion, cerebral, relief of, by dry cupping, 241.
Conjunctiva, ecchymosis of, 733.
Conjunctival inflammation, iodine in, 818.
Constantinople, surgical school at, 95.
Consumption, pulmonary, analysis of the blood in, 72; new treatment of, 187.
Consultation practice in London, decline of, 575.
Contagion in malignant cholera, remarks on, 301; in diseases of the skin, remarks on, 526; in cholera, medical scribbling on, 696.
Contracts, parish medical, 568, 612.
Convulsions, M. Andral on, 36; as an effect of tea drinking, 277.
Cooper, Sir Astley, remarks of, to a country surgeon, 575; one of the certificates of, 791.
Cooper, Mr. B., improper new appointment of 603, 606, 819.

Cooper *versus* Wakley, quotations from the evidence of Mr. Brodie and Dr. Roget in, 479, 791.
Cornea, stains of, 326; ulcers of, 514.
Coroner, medical, election of one for Shropshire, 259.
Coroners, non-medical, specimens of the proceedings and ignorance of, 340, 479.
Corporations, medical, conflicting interests of, 283.
Corruption, professional, Dr. Barlow on, 460.
Costello, Mr. W. B., on Clot Bey's mode of performing lithotomy, 6; on a lithotritic operation, followed by meningitis, 109; removal of stone by, in one sitting, 203, 330; percussor of, 560, 725.
Countenances, floridity of, 450.
Counter-irritation, use of, in pulmonary diseases, 319.
County natural history societies, Dr. Conolly on, 465.
Courtier, description of a thorough-bred one, 224.
Courtney, Mr. R., on medical reform, 314.
Cramps and vomiting, perils of, 637.
Crocodile, circulation of blood in, 313.
Croton oil, as an external irritant, 239.
Croup, tracheotomy in, 811.
Crural artery, ligature of, 198.
Cupping, dry, value of, 204.
Cuspidati, horizontal, 196.
Cyanosis and malformation of the heart, 530.
Cyst, hydatid, in the base of the cranium, 105; serous, in the skull, destroying the right lobe of the cerebellum, 170.
Cysts, hydatid, pressure of, on nerves, 161.

D.

Dalrymple, Mr. J., offer of, at the Aldersgate-street Dispensary, 822.
Darwall, Dr., death of, 740.
Dashwood, Mr., letter from, 675.
Deafness in the English, 82.
Delirium ferox, case of, 449; tremens, case of, 539, 734; on opium and venesection in, 719.
Dendy, Mr. W. C., on the pathology of cholera, 626.
Dentist advertisers, 46.
Dermatolysis, nature of, 568.
Dermatoses, eczematous, Baron Alibert on, 613.
Diabetes mellitus, case of, treated with strychnine, 28.
Diploma, a lost one, 64, 144.
Dislocation of the shoulder, Malgaigne's mode of reducing, 31, 155; of the humerus, 701; of the femur, 641, 671, 700; of the jaw, 673; of the knee, 732; of the inferior extremity of the ulna, 748.
Dislocations, effect of the mind in reducing, 298; of the shoulder, on fixing the scapula in, 396.
Dispensaries, "self-supporting," remarks on, 19, 51, 728, 793; disregard of the poor at, 790; mode of obtaining offices in, 477; for cholera patients, 534.
Dispensary, Sheffield, dissention between the governors and medical officers of, 628, 637, 785, 789.
Dispensing, proposed rules respecting, 606.
Douchez, Mr. G., a case of scrofulous caries by, 40.
Dresserships, gratuitous, at the London Hospital, 674.
Dressing of stumps, Dupuytren on, 618.
Drinks, stimulating, pernicious effect of on wounds, 656.
Dropsy, use of muriate of gold in, 8.
Druggists, privileges of, 260.
Dublin Medical Journal, extracts from, 240.
Dupuytren, Baron, lectures by, on:—foreign bodies and growths in the air-passages; coin and bean in the air-passages, cases of, 97, 99.
——— fatal closure of the glottis by a polypus, 100.
——— guttural angina treated successfully by tracheotomy, 101.
——— prolapsus ani, 133.
——— erectile tissue and erectile tumours, their characters and treatment, with cases, 165 to 171.
——— nature and treatment, with cases, of fungus hæmatodes, 197.
——— artificial anus and its cure with the enterotome, 261.
——— period for operating in, with cases, and theory of, hare lip, 293.
——— nature and treatment of anthrax, 297.
——— blenorrhagic ophthalmia, 325.
——— stains of the cornea, 326.
——— inflamed retinæ, 327.
——— formation of callus, and the means of remedying it when vicious or deformed, 327.
——— amputations, generally considered, 581.
——— amputations of the superior extremities, 587.
——— amputations of the inferior extremities, 589.
——— hemorrhage after amputation, 616.
——— torsion of arteries, 617.
——— mode of dressing stumps, 618.
——— hydrocele and its principal varieties, 682.
——— treatment of goitre by the seton, 685.
——— preparations of arsenic as remedies against cancer and other destructive ulcers, 686.
——— gangrene symptomatic of arteritis, 744.
——— senile gangrene, 747.
——— luxations of the inferior extremity of the ulna, 748.

Dupuytren on accidents to the vertebræ, 776.
——— diseases simulating luxations of the vertebræ, 779.
Dwarfs, theory of, 428.
Dyschromata, position of in Alibert's arrangement, 568.
Dysphagia, peculiar species of, 242.
Dysuria, from penal deformity, 717.

E.

Eachus, Mr. G. E., on chlorine as an antidote to prussic acid, 110.
Ear, Mr. Wright on disease of, 117, 154, 189, 203; delicacy of, 810.
Earle, Mr., his account of himself, 88.
——— on the College museum, 404.
——— Professor Walther's opinion of, as an aurist, 751.
Earwigs, anti-medical reform, 580.
Eccles, Mr. W., letters of, on a lost diploma, 64, 144.
Ecchymosis of the conjunctiva, 733.
Eczema rubrum, remarks on, 279.
Eczemata, position of, in Alibert's classification, 491.
Eczemation, cutaneous, elementary phenomena of, 613.
Edinburgh chair of Clinical Surgery, sale of, 157.
Education, medical, remarks on, 91; Mr. Wardrop on, 456.
Edwards, Mr. D. O., on lithotripsy and the percussor, 560, 725, 820.
Egypt, progress of medicine in, 88.
Elaterium, employment of, in rheumatism, 10, 48.
Elbow, Velpeau on the arteries of, 550; wound of, 672; dislocation of, 733.
Elbow-joint, inflammation of, 641.
Elephantia, description of, 526.
Elliotson, Dr., clinical remarks by, on strychnine as a substitute for opium, 21; election of, as president of the Med. Chir. Soc., 54; portrait and biographical sketch of, 341.
Embryology, state of the science of, 426.
Emetic, effect of one, on the uterus, 724.
Emetics, treatment of erysipelas with, 774.
Empyema, case of, 734.
Enemas, remarks on the mode of administering, 44.
Enemata, employment of opium in the form of, 241.
Enterotome, Dupuytren's employment of, for the cure of artificial anus, 261; Mr. Hurt's case in which it was employed, 812.
Epidemic, extraordinary, at Paris, 87; Parisian, of the feet, 125; anomalous, in London, 124.
Epilepsy, Andral on the varieties, pathology, causes, and treatment of, 65, 102; case of, for which the patient was magnetized, 210.
Epinyctis, description of, 493.
Epps, Dr., on vaccination, 137; on the preparation of extracts, 423; note from, respecting a prize essay, 605; on the iodides of mercury, 660; on prussic acid prescriptions, 699.
Ether, discoloration of the sulphate of indigo by, 127.
Ethics, medical, Dr. Hastings on, 461.
Etiquette, professional, breach of, 196.
Ergot of rye, use of, in menorrhagia and metrorrhagia, 27; Mr. Weddell on, 42; anti-hemorrhagic effects of in the male, 75, 388; powers of, 599.
Erysipelas (*see* Alibert, Baron); of the head and chest, 170; of the hand and arm, 385; description of, 492; phlegmonous, cases of, 542, 801; typhoid, 546; with pneumonia, 577; alkaline treatment of, 644; of the head and face, 799.
Erythema (*see* Alibert, Baron), description of, 491.
Esthiomenos, description of, 524.
Exanthemata, position of, in Alibert's classification, 491.
Exostosis of the femur, 318.
Expiration, theory of, 361.
Extraction of teeth, Mr. Delafons on, 12; Mr. Bené on, 236.
Extracts, medicinal, preparation of, 423.
Eye, case of animalcule in the anterior chamber of, 5, 817; diseases of, Dupuytren on, 325; inflammation of, with fungous growth, 513; inflammation of, 713; disease of, 733.
Eye-surgery in England, Professor Walther on the state of, 750.

F.

Face, paralysis of, external use of croton oil in, 230; ulcer of, 321; erysipelas of, 799.
Facial artery, Velpeau on the ligature of, 553.
Factory commission, on the appointment of, 149.
Factory system, questions relating to, 376, 414.
Factories, overwork in, 220.
Farcimen, nature of, 566.
Favus, description of, 496.
Femoral artery, ligature of, 488.
Femur, exostosis of, 318; dislocation of, 641, 671, 700.
Fever, puerperal, alleged rarity of, 183; case of, 801; irritative, case of, 668; simple, Dr. Latham's treatment of, 544; on relapses in, 655.
Fibula, fracture of, 767.
Finger, erysipelas of the hand following amputation of, 385.
Fingers, Dupuytren on amputations of, 587.
Fire, severe injury from, 718.
Fires, on the extinction of, 718.
Fistula in perineo, case of, 92; in ano with phthisis, 835.

Fissure, median, 531; congenital, of the cheeks, 531.
Float, Longman's, pun on, 316.
Flour, on the hygrometric water in, 126.
Fœtus, human, circulation in, 313; auscultation of, in utero, 715.
Food, quantity of, compared with the secretions, 188; improper quantity and quality, pernicious effects of, after operations, 654.
Foot, injury to, 799, 835.
Fracas at St. Bartholomew's, 667.
Fracture of the skull, 431, 577; of the cervical vertebræ, 44; of the ribs, 541, 542; of the olecranon, 798; of the os innominatum, 796; of the acetabulum, 671; compound, of the tibia, 539; of the tibia and fibula, 514, 732, 734, 767; of the scapula, 732; of the patella, 319, 701, 769.
Fractures, on the formation of callus after, 327.
French Government, intentions of, respecting phrenology, 407.
French, the, opinions of, on English surgeons, 755.
Friction, apparatus for producing, 306.
Fumigation with carbonic acid gas in glanders, 136.
Fungus of the eyeball, 513.
Fungus hæmatodes, nature of, 197.
Furuncle, Dupuytren on, 297.
Furunculus, description of, 493.

G.

Gall, Dr., life and phrenological developments of, 399.
Ganglia, treatment of, with iodine, 129.
Ganglion oticum Arnoldi, discovery of, essay on, 687.
Ganglions, occurrence of in tendinous sheaths, 672.
Gangrene senile, Dupuytren on the pathology and treatment of, 744; after cancer, 768; from aneurysm of the subclavian, 806.
Gardens, botanical, at Chelsea, inconvenient regulations of, 292.
Gas, carbonic acid, 136; fumigation with, in glanders, 39.
Gastrotomy, on the operation of, 254.
Generation, organs of, in the embryo, 50; anomalies in the apparatus of, 432.
Giants, theory of, 428.
Gland, thyroid, sloughing of, 704.
Glanders, carbonic acid gas fumigation in, 136.
Glands, sympathetic swelling of, 702.
Glans penis, deformity of, 717.
Glasgow University, letter on the affairs of, 91; vindication of the character of, 571.
Gleet, failure of nitrate-of-silver injection in, 135.
Glottis, fatal closure of, by a polypus, 100.
Gluteal artery, aneurysm of, 739.
Goitre, treatment of, by seton, 685.
Gonorrhœa, injection of nitrate of silver in, 134; succeeded by a papular eruption, 316.
Gold, muriate of, in dropsy, 8.
Gooch, Mr. J., on the lobelia inflata, 161.
Gout, case of, cured by the mineral magnet, 459; metastasis of, 519.
Gouty diathesis, effects of, in operations, 519.
Gower, Mr. S., professional reminiscences by, 717.
Graafe, Baron, visit of, to St. Bartholomew's Hospital, 797.
Græme, Dr. A., article from, by Professor Walther, 750.
Grainger, Messrs., eulogies of, 63, 723.
Granger, Mr. F., case by, of discharge of alvine concretions through the abdominal parietes, 171.
Granville and Lee, Drs., controversy between, 26, 77, 142.
Green, professor, J. H., remarks on his scheme of reform, 723.
Grigg, Mr. T., on the treatment of cholera, 111.
Grinding, medical, 315.
Gum, tumour of, 94.
Guthrie, Mr., anti-reform movements of, 442; sketch of, as an oculist, 750; offer of a prize by, 770; ligature of an artery by, at the Ophthalmic Hospital; complaint against, 820. (*See* also Westminster Hospital.)
Guy's Hospital, cases occurring at. (*See* Hospital Reports.)

H.

Hæmaturia, case of, 512, 643.
Hæmatodes, position of, in Alibert's classification, 567.
Halford, Sir H., peculiar talents of, 664; bulletin signing by, 791; intercepted letters of, 761, 792.
Hair, total loss of, 278.
Halo, a new surgical one, 739.
Hamilton, Mr. A., letter from, 826.
Hand, Velpeau on the arteries of, 549; and arm, erysipelas of, 385.
Hare-lip and its treatment, Dupuytren on, 293; G. St.-Hilaire on, 531.
Harveian oration, 452.
Hastings, W. J., on malignant cholera, 810.
Head, Andral on vague nervous pains of, 1; hysterical determination of, 240; fatal injury of, 451; extensive injury of, 798; erysipelas of, 799.
Headach, bleeding in the paroxysms of, 302.
Hearing, illusions of, 437.
Heart, disturbance of, by tea drinking, 276; disordered action of, 713; on the sounds, impulse, and rythm of, 780; connexion of respiration with the action of, 363.

Heat, animal, connexion of respiration with, 365.
Heath, Dr. J. P., shampooing apparatus by, 306.
Hemorrhage from the jaws, case of, 46; after amputations, 616; secondary, Dupuytren on, 620; secondary, Mr. Wardrop on, 652.
Hemorrhage, value of ergot of rye in cases of, 386.
Hemicrania, Andral on, 1.
Hermaphrodism, review of G. St.-Hilaire on, 48; extraordinary case of, 60.
Hermaphrodites, theory of the formation of, 51.
Hernia, strangulated femoral, 234, 766, 831; femoral, with double sac, 288; strangulated inguinal, with anomalous structure, 94; review of Stephens on, 249; Mr. Key's memoir on, 377; strangulated, Mr. James on the diagnosis of, 464; on animal food after an operation for, 86, 655; femoral, followed by artificial anus, 812.
Herpes, description of, 524.
Heteromorphea, position of, in Alibert's classification, 568.
Heurteloup, Baron, cases of stone cured with the percussor by (*see* Lithotripsy).
Hilèv, Mr. J. S., on the preparation of iodic acid, 305, 555.
Hip and knee, disease of, 452.
Hip-joint, obscure disease of, 317; tumour connected with, 317.
Holland, state of medical science in, 390.
Hope, Dr., remarks on his theory of the heart's sounds, 780.
Horncastle, inquest at, 85, 287.
Hospitals, remarks on experimenting in, 555; libraries for the patients in, 785.
Hospital reports:—Case of diabetes mellitus, treated with strychnine as a substitute for opium, 28, (*St. Thomas's Hospital*).—Luxation of the humerus downwards and forwards; reduction by M. Malgaigne's method, 31, (*Hôpital St. Louis*).—Cut throat—tracheotomy, (*St. George's*).—Apoplexia traumatica from severe injury, 92; fistula in perineo, 92; removal of the tonsils, 93, (*Middlesex*).—Lithotomy—death, 94; strangulated inguinal hernia—anomalous structure, 94; tumour of the gum, extirpation, want of saws, 94, (*St. George's*).—Singular affection of the veins; scirrhus of the stomach, 128, (*Hôtel Dieu*).—Treatment of ganglia with iodine, 129; employment of iodine in periostosis, 130, (*Hospital des Veneriens*).—Inflammatory action of the chest, head, stomach, &c. with paralysis of the lower extremities, 130; fracture of the cranium, 131, (*Middlesex*).—Pressure of hydatid cysts on various nerves, 161, (*Hôpital Cochin* and *Hotel Dieu*).—Hydrocele; injection of astringent fluid into the cellular tissue, 164, (*Hôpital St. Louis*).—Femoral hernia, with double hernial sac, 288, (*Middlesex*).—Neuralgia, arrested by the magnet, 311; tic douloureux, arrest of, by the magnet, 312; tooth-ach cured by the magnet, 313, (*St. Thomas's*). — Papular eruption succeeding gonorrhœa; lithotomy, 316, (*London*).—Diseased hip-joint; bursal tumour of the groin communicating with hip-joint, 317; diseased spine; paralysis, 318; counter irritation in disease of the lungs; fractured patella, 319; diseased breast; cutaneous diseases; the pulse; quinine in large doses; burns; malignant disease of the penis, 320; ulcer of the face; diseased cervical vertebræ; various operations, 321, (*St. George's*).—Elections and manœuvres, 383, (*Westminster*).—Lithotripsy, 384; erysipelas of hand and arm following amputation of the finger, 385; new ala nasi, 385, (*Bartholomew's*).—Singular case of hydrocele, 386, (*Middlesex*).—Ligature of external iliac for inguinal aneurism, 387, 566, (*Bristol Infirmary*).—Carotid aneurism treated by ligature on the distal side, 421, (*Civil Hospital* at Mauritius).—Insanity; cut-throat, 448, (*Westminster*).—Iodine in tumours; half vision; thickening of urethral lining membrane; extirpation of a fatty tumour, 450; florid countenances; disease of the humerus; paralysis of the foot; injury to the head, 451; diseased knee and hip, 452, (*St. George's*).—Operation for cataract; lithotomy, 511; hæmaturia, 512, 643, (*Westminster*).—Inflammation of the eye, with fungous growth, 513; ulcer on the cornea; compound fracture of the leg, amputation; tumour in the neck, operation, 514; lithotripsy; purpura, 515, (*St. Bartholomew's*).—Fractured tibia, delirium tremens; diseased knee, amputation, death, 539; injury to abdomen, 540; fractured ribs; crushing of the chest, 541; fractured ribs, bleeding with a vengeance, 542, (*London*).—Phlegmonous erysipelas, 542; lithotomy; retracted lip; fever cases, 543, (*St. Bartholomew's*).—Abortive necrosis, amputation, 545; typhoid erysipelas, coma, sphacelus, death, 546; financial affairs of the hospital, 547, (*Westminster*). — Fractured skull, pressure on the brain, 577; pneumonia with erysipelas, efficacy of warm-baths, fomentations, &c., 577; hysteria relieved by opium, 610; non-absorption of morbid structures, 611, (*Westminster*).—Syphilitic ulceration of the throat, 612; perils of vomiting and cramps, 639; perforation of the humerus by an iron bolt, 640; inflammation of the elbow-joint, 641, (*London*).—Dislocation of the femur, 641; lumbar abscess, 642; scrofula; a

miscellany, 643; Long, the quack, 668; amputated breast, irritative fever, 668; varicocele and paraplegia, 669; extra capsular fracture of the cervix femoris cured without shortening, 670, (*Westminster*).—Aneurysm of the aorta communicating with the vena cava superior, 666, (*St. Bartholomew's*). — Dislocated femur; scrotal disease; fungous tumours of the os calcis, 671; wounded elbow; ganglions; iodine in diseased prostate; muscular tumour; rheumatic affection of knee-joint, 672; re-absorption of effused blood; strictures; dozen-toed child, 673, (*St. George's*).—Dislocated jaw; fractured patella from muscular action, 673; phagedenic ulceration, 674, (*London*).—Cholera, 699; dislocated femur, 700, (*St. George's*).—Addition to the lithotriptic percussor, 700; fractured patellæ; dislocated humerus; hydrocele, 701; enlarged glands, 702, (*Guy's*).—Note-taking prize; vomiting of urinal fluid; sloughing of the thyroid gland, cure, 704; manufacture of the pharmacopœias, 705; scrofula, 705; syphilitic ulceration, 706; varicose veins, 707, (*Westminster*).—Dislocation of the knee, with fracture of the, tibia, fibula and scapula, 732; dislocated elbow-joint; ecchymosis of the conjunctiva, similar to inflammatory chemosis, 733; compound fracture of the leg, delirium tremens, 734, (*Bartholomew's*). — Empyema and pneumathorax, 734; lithotomy, laceration of rectum; medical Machiavelism, 736, 737, (*Westminster*).—Ligature of the common iliac for aneurysm of the gluteal artery, 739, (*Ophthalmic*).—Lacerated urethra, 765; strangulated hernia operation, 766, (*St. Bartholomew's*).—Chronic inflammation of knee-joint; iodine in strumous ulcerations, 767; gangrene following carcinoma; marasmus, 768; irritable ulcers, 769, (*Guy's*).—Withdrawal of a record; proposed reform, 770, (*Westminster*).—Purpura hæmorrhagica; abscess in the loins, diseased kidney, 795; fracture of the innominatum; visit of Baron Graafe, 796; lithotripsy; malformation of the urinary apparatus, 797; severe wound of the scalp, 798, (*St. Bartholomew's*).—Erysipelas of head and face; injury to the leg and foot, 799; abscess and sloughing of the leg, 800, (*London*).—Laryngitis, proposed tracheotomy, e0purysipelas, 7erperal feve Armstrong's treatment; various treatments of burns and scalds, 802; stone, nature's accommodating temper; valvular incisions, 804, (*Westminster*).—Injury of leg, 825, (*London*).—Ulcer of pylorus, 827, (*St. Bartholomew's*).—Inflammation of tibia, 829, (*Middlesex*).—Mr. Brodie on injuries of the spine, (*St. George's*).—Strangulated femoral hernia, 831; hysteria, 834; cut foot; fistula in ano and phthisis, 835. (*Westminster*).

Hufeland, honour paid to, 621.

Hume, Mr. Joseph, communication from, 302.

Humerus, dislocation of, downwards and forwards, 31; simple dislocation of, 155, 701; on fixing the scapula in dislocations of, 396; disease of, 451; perforation of, 640.

Hurt, Mr. S., operation by, for artificial anus, with the enterotome, 812.

Hutchinson, Dr. R., on croton oil as an external irritant, 229; case by, of severe chorea, treated with enormous doses of carbonate of iron, 752.

Hydatid in the eye of a child, 5; cyst, within the base of the skull, 62; pressure of, on nerves, 161.

Hydatids, cranial, Montault's remarkable case of, 105.

Hydrocyanic acid. (*See* Prussic acid.)

Hymen, retention of urine from imperforation of, 395.

Hysteria, strychnine in, 76; mistaken for disease of the spine, 452; relieved by opium, 610.

Hysteria, puerperal, Dr. Armstrong's treatment of, 801; with seeming paralysis of arms, 832.

Hydrocele, astringent injection into the cellular tissue in, 164; singular case of, 386; complicated with stone, 496; its varieties, Dupuytren on, 682; hourglass, remarkable case of, 684; hospital cases of, 701, 713.

Hydrocephalus, Dr. Trail's case of, 393; treatment of, with iodine, 783.

I.

Ichthyosis, nature of, 568.

Iliac artery, external, ligature of, 387, 489, 566, 658; internal, ligature of, 490; common, ligature of, 490, 739.

Illusions in the insane, Esquirol on, 435.

Imperforations of the body, Hilaire on, 434.

Incisions, surgical, Velpeau on, 471.

Indigo, decoloration of its sulphate by ether, 127.

Infants, Mr. Wardrop on operations on, 522.

Inflammation, general, case of, 130; conjunctival, iodine in, 818.

Influenza, outbreak of, in London, 124; debates on, 145, 147, 172, 239; remarks on, by Dr. Venables, 200; death from, 497; outbreak of, at Paris, 186.

Innominata, Velpeau on the ligature of, 554.

Innominatum, fracture of, 796.

Inoculation, occurrence of small-pox after, 242; as a cause of blenorrhagic ophthalmia, 325.

Inquest on a monstrosity, 85; at Layton, 95; at Colchester, 339; on a medical student, 479.
Inquests, non-remuneration for medical attendance at, 195; medical evidence at, 339.
Insanity, young, separate treatment of, 127; Esquirol on, 435; on confinement in, 438; throat cut in a fit of, 448.
Inspiration, theory of, 360.
Insects, circulation of the blood in, 231.
Instruments, operating, remarks on, 595.
Iodic acid. (*See* Acid iodic.)
Iodine, employment of, in removing tumours, 10, 450; in periostosis, 130; treatment of ganglia with, 129; in diseased ancle-joint, 452; in diseased prostate, 672; in strumous ulcerations, 767; in hydrocephalus, 783; in conjunctival inflammation, 818.
Iritis, Dupuytren on, 327.
Iron, carbonate of, in chorea, 752; sulphate of, in malignant cholera, 816.

J.

Jaw, dislocation of, 673.
Jaws, hemorrhage from, 46.
Jennerian Society, "diploma" of, 420.
Jennings, Mr. E. A., case by, of aneurysm and rupture of the basilar artery, 397.
Joints, epidemic affection of, 126; diseases of, 452.
Jones, Mr. T. W., on the rete mucosum, 523.
Jurisprudence, medical, obstructions to the study of, 195.

K.

Keith, Mr. W., on medical reform, 355.
Kelis, description of, 525.
Key, Mr., on dividing the stricture in strangulated hernia, review of, 377; and The Lancet, 768.
Kidney, abscess following injury of, 795.
Kidneys, disease of, 496, 797.
King's College, distribution of prizes at, 316; connexion of the anti-medical reformers with, 793.
Knee, dislocation of, 732; inflammation of, 767; and hip, disease of, 452.
Knee-joint, scrofulous disease of, 518, 559; rheumatic affection of, 672.

L.

Labour, difficult, case of, 724.
Labourers, remarks on the food of, 189.
Laming, Mr. R., on the preparation of prussic acid, 623.
Lancet, The, vote respecting, at the London Hospital Medical Society, 148; and Mr. Key, 768.
Language, derangements of the faculty of, 330.
Lanyon, Dr. R., on the sanative effects of hydrocyanic acid, 74; on the anti-hemorrhagic effects of ergot of rye in the male, 75.
Lardner, Mr. W., on the cholera at Oporto, 300.
Laryngitis, chronic, counter-irritation in, with croton oil, 229; acute, case of, 565; case of, 801.
Larynx, on foreign bodies in, 97.
Law, medical, state of, 223; Lord Melbourne's remarks on, 283; ridiculous productions of some writers on, 351; propagation of errors in, 373; reasons for renovation of, 411; present state of, 501; parliamentary investigation of, 665.
Law, Dr. Ferdinand, on respiration, 334, 359.
Lauth, Professor, references to the discoveries of, relating to the uterus and placenta, 26, 77, 142.
Lecturers, hospital, meeting of, 516.
Lee, Dr. R., on the structure of the placenta, 113. (*See* also references under Lauth, Professor.)
Leeds Infirmary, election at, 386.
Leg, fungus hæmatodes of, 198; compound fracture of, 514; fracture of, 734; injury to, 799; abscess and sloughing of, 800; Dupuytren on amputation of, 590.
Leg-baths, hot, good effects of, 273
Leprodes, position of in Alibert'
cation, 525.
Letters, intercepted, of the a
formers, 762, 792.
Leuce, description of, 525
Lewins, Dr. R., on the sta
509; on the impertin
511.
Ley, Dr. H., on the stru
centa, 366.
Libraries, hospital, for patie
Library of the College of S
plaint from, 119.
Licentiates of the Coll. of Phys
tion from, against the College,
ber of, admitted since 1771, 635.
Life, phenomena of, 334.
Ligature of arteries, Velpeau on (*see* Velpeau, M.); Dupuytren on the proper mode of performing, 616; Dupuytren on, in some of the chief arteries, for aneurysm, 805.
Light, exclusion of, to prevent pitting in small-pox, 71.
Lime lather for shaving, 820.
Lip, erectile tumour of, 168; hare, Dupuytren on, 292; retraction of, 543.
Lithotomy, Clot-Bey's mode of performing, 6; unsuccessful case of, 94; operations of, 316, 511, 543, 611; blundering operation of, in Scotland, 535; laceration of the rectum in, 736.
Lithotrity, Clot-Bey's opinion of, 8; progress of, in America, 43; best situation for patients in, 27; Velpeau's account of, 392; cases of, 109, 626.

Lithotripsy, remarks on the merits of, 499; cases of, 203, 330, 384, 496, 815; at St. Bartholomew's Hospital, 418, 515.
Lithotriptic percussor, invention of, and addition to, 700, 785, 794, 820; objection to, 736.
Lobelia inflata, discovery of, 132, 160.
Logan, Mr. R., case by, of animalcule in a child's eye, 5; result of, 817.
London-Hospital Medical Society, elections at, and vote of, for The Lancet, 148; case related at, of polypi of the uterus, 148.
London Hospital, remarks on the school at, 708; profits on "subjects" at, 800, 826. (*See also* Hospital Reports.)
London Medical Associations, commencement of, 580; paper read at, 687.
London Medical Society, reports of proceedings and discussions at; viz. new mode of voting; elaterium in rheumatism; removal of tumours by friction with iodine, 10; effects of tea and coffee drinking, 48; the influenza, 145, 172, 239; death of Dr. Babington, 218; new stomach evacuator, 240; complete loss of the hair, 278; eczema rubrum, 279.
London Phrenological Society, reports of discussions and proceedings at:—pro- [illegible]ress of the Association, 405; on a paper [illegible] Mr. Burke on the social propensities [illegible]an, 406, 661; paper by the Marquis [illegible]ti on the character and cerebral or- [illegible]tion of Gall, 399, 406, 408; in- [illegible] of the French Government, sent [illegible] Society, respecting the state of [illegible]ogy in Britain, 407; state of phre- [illegible] in America; on a cast of a mur- [illegible] head; the character of Dr. Spurz- [illegible] 409; reply to a report from, 661.
[illegible]se quack, practices of, 668.
[illegible] Mr. P. B., on nitrate-of-silver injec- [illegible]a in gonorrhœa and gleet, 134.
[illegible]es veneres, terrible effects of, on the face, 357.
Luke, Mr. J., letter from, 326.
Lungs, on counter-irritation in disease of, 319; on the functions of, 334, 359.
Luxations of the ulna, Dupuytren on, 748; of the vertebræ, Dupuytren on, 776; on symptoms simulating luxations of the vertebræ, 779.
Lymph, vaccine, preference of points to glasses for, 118; on the means of preserving, 306.
Lynn, Mr., portrait and biographical notice of, 156.

M.

Madness, Esquirol on, 435.
Magnet, powers of, in nervous affections, 311: cure of gout with, 459; cure of tic douloureux with, 693.
Magnetism, animal, report to the French Academy of Medicine on 175, 205.
Maitland, Mr. C., on iodic acid, 508.
Mala praxis, trial for alleged, at Derby, 85.
Malformation, of the bladder and abdominal parietes, 280, 797. (*See also* Monstrosities.)
Malyn, Mr. J., autopsy by, after the operation of lithotripsy, 498.
Man, social propensities of, 406.
Mann, Mr. J., on phosphorus in cholera, 755.
Marasmus, case of, 768.
Marylebone Dispensary, election at, 676.
Maxillary artery, external, Velpeau on the ligature of, 554.
Mayo, Professor, quack advertisement of a book by, 793.
M'Keever, Dr. T., on auscultation in pregnancy, 715.
Medical Reform Association, prize proposed by, 605.
Medicine, Operative, analysis of Velpeau's, 389, 471, 485, 549.
Medicines, English patent, prohibition of, in France, 87; on the exhibition of, after operations, 711.
Melanosis of the eye, 422; of the cheek, 423; interesting case of, 470.
Melitagra, description of, 524.
Meningitis, case of, 110.
Menorrhagia, use of ergot of rye in, 27.
Menstruation, diseases of, 286.
Mercury, terrible effects of, on the face, 357; on the iodides of, 660; proto-ioduret of, in secondary syphilis, 204.
Metrorrhagia, use of ergot of rye in, 27.
Machiavelism, medical, 737, 787.
Migraine, Andral on, 2.
Mile-End, election of a surgeon at, 516.
Miliaria, description of, 495.
Milk, mother's, effect of moral excitement on, 523.
Mind, the, Marquis Moscati on, 399; of patients to be watched in great operations, 521.
Ministers, views of, on medical reform, 185.
Monsters, cases of, 499, 314, 620, 732.
Monstrosities, G. St.-Hilaire on, 424, 527.
Morphia, acetate of, test for, 398.
Moscati, Marquis, on the character of Gall, 399. (*See also* Phrenological Society.)
Mucous membrane, effect of exposure on, 280, 707; sensibility of, 810.
Muntz, Dr. F., case of scabby ulceration, cured by vaccination by, 137.
Murder, investigation of a case of, 243.
Murderer, phrenological developments of one, 409.
Muriate of gold in dropsy, 8.
Museum, of the College, filthy state of, 404.
Mustard, adulteration of, 127.
Mycosis, description of, 527.
Myopathy, periodical, following contusion of the thighs, 621.

Inquest on a monstrosity, 85; at Layton, 95; at Colchester, 359; on a medical student, 479.
Inquests, non-remuneration for medical attendance at, 195; medical evidence at, 339.
Insanity, young, separate treatment of, 127; Esquirol on, 435; on confinement in, 438; throat cut in a fit of, 448.
Inspiration, theory of, 360.
Insects, circulation of the blood in, 231.
Instruments, operating, remarks on, 595.
Iodic acid. (*See* Acid iodic.)
Iodine, employment of, in removing tumours, 10, 450; in periostosis, 130; treatment of ganglia with, 129; in diseased ancle-joint, 452; in diseased prostate, 672; in strumous ulcerations, 767; in hydrocephalus, 783; in conjunctival inflammation, 818.
Iritis, Dupuytren on, 327.
Iron, carbonate of, in chorea, 752; sulphate of, in malignant cholera, 816.

J.

Jaw, dislocation of, 673.
Jaws, hemorrhage from, 46.
Jennerian Society, "diploma" of, 420.
Jennings, Mr. E. A., case by, of aneurysm and rupture of the basilar artery, 397.
Joints, epidemic affection of, 126; diseases of, 452.
Jones, Mr. T. W., on the rete mucosum, 523.
Jurisprudence, medical, obstructions to the study of, 195.

K.

Keith, Mr. W., on medical reform, 355.
Kelis, description of, 525.
Key, Mr., on dividing the stricture in strangulated hernia, review of, 377; and The Lancet, 768.
Kidney, abscess following injury of, 795.
Kidneys, disease of, 496, 797.
King's College, distribution of prizes at, 316; connexion of the anti-medical reformers with, 793.
Knee, dislocation of, 732; inflammation of, 767; and hip, disease of, 452.
Knee-joint, scrofulous disease of, 518, 539; rheumatic affection of, 672.

L.

Labour, difficult, case of, 724.
Labourers, remarks on the food of, 189.
Laming, Mr. R., on the preparation of prussic acid, 623.
Lancet, The, vote respecting, at the London Hospital Medical Society, 148; and Mr. Key, 768.
Language, derangements of the faculty of, 330.
Lanyon, Dr. R., on the sanative effects of hydrocyanic acid, 74; on the anti-hemorrhagic effects of ergot of rye in the male, 75.
Lardner, Mr. W., on the cholera at Oporto, 300.
Laryngitis, chronic, counter-irritation in, with croton oil, 229; acute, case of, 565; case of, 801.
Larynx, on foreign bodies in, 97.
Law, medical, state of, 223; Lord Melbourne's remarks on, 283; ridiculous productions of some writers on, 351; propagation of errors in, 373; reasons for renovation of, 411; present state of, 501; parliamentary investigation of, 665.
Law, Dr. Ferdinand, on respiration, 334, 359.
Lauth, Professor, references to the discoveries of, relating to the uterus and placenta, 26, 77, 142.
Lecturers, hospital, meeting of, 516.
Lee, Dr. R., on the structure of the placenta, 113. (*See* also references under Lauth, Professor.)
Leeds Infirmary, election at, 386.
Leg, fungus hæmatodes of, 198; compound fracture of, 514; fracture of, 734; injury to, 799; abscess and sloughing of, 800; Dupuytren on amputation of, 590.
Leg-baths, hot, good effects of, 273.
Leprodes, position of in Alibert's classification, 525.
Letters, intercepted, of the anti-medical reformers, 762, 792.
Leuce, description of, 525; case of, 526.
Lewins, Dr. R., on the state of medical law, 509; on the impertinence of Roderick, 511.
Ley, Dr. H., on the structure of the placenta, 366.
Libraries, hospital, for patients, 785.
Library of the College of Surgeons, complaint from, 119.
Licentiates of the Coll. of Physicians, petition from, against the College, 635; number of, admitted since 1771, 635.
Life, phenomena of, 334.
Ligature of arteries, Velpeau on (*see* Velpeau, M.); Dupuytren on the proper mode of performing, 616; Dupuytren on, in some of the chief arteries, for aneurysm, 805.
Light, exclusion of, to prevent pitting in small-pox, 71.
Lime lather for shaving, 820.
Lip, erectile tumour of, 168; hare, Dupuytren on, 292; retraction of, 543.
Lithotomy, Clot-Bey's mode of performing, 6; unsuccessful case of, 94; operations of, 316, 511, 543, 611; blundering operation of, in Scotland, 535; laceration of the rectum in, 736.
Lithotrity, Clot-Bey's opinion of, 8; progress of, in America, 43; best situation for patients in, 27; Velpeau's account of, 392; cases of, 109, 626.

Lithotripsy, remarks on the merits of, 499; cases of, 203, 330, 384, 496, 815; at St. Bartholomew's Hospital, 418, 515.
Lithotriptic percussor, invention of, and addition to, 700, 785, 794, 820; objection to, 736.
Lobelia inflata, discovery of, 132, 160.
Logan, Mr. R., case by, of animalcule in a child's eye, 5; result of, 817.
London-Hospital Medical Society, elections at, and vote of, for The Lancet, 148; case related at, of polypi of the uterus, 148.
London Hospital, remarks on the school at, 708; profits on "subjects" at, 800, 826. (*See also* Hospital Reports.)
London Medical Associations, commencement of, 580; paper read at, 687.
London Medical Society, reports of proceedings and discussions at; viz. new mode of voting; elaterium in rheumatism; removal of tumours by friction with iodine, 10; effects of tea and coffee drinking, 48; the influenza, 145, 172, 239; death of Dr. Babington, 218; new stomach evacuator, 240; complete loss of the hair, 278; eczema rubrum, 279.
London Phrenological Society, reports of discussions and proceedings at:—progress of the Association, 405; on a paper by Mr. Burke on the social propensities of man, 406, 661; paper by the Marquis Moscati on the character and cerebral organization of Gall, 399, 406, 408; inquiries of the French Government, sent to the Society, respecting the state of phrenology in Britain, 407; state of phrenology in America; on a cast of a murderer's head; the character of Dr. Spurzheim, 409; reply to a report from, 661.
Long, the quack, practices of, 668.
Lucas, Mr. P. B., on nitrate-of-silver injection in gonorrhœa and gleet, 134.
Lues venerea, terrible effects of, on the face, 357.
Luke, Mr. J., letter from, 826.
Lungs, on counter-irritation in disease of, 319; on the functions of, 334, 359.
Luxations of the ulna, Dupuytren on, 748; of the vertebræ, Dupuytren on, 776; on symptoms simulating luxations of the vertebræ, 779.
Lymph, vaccine, preference of points to glasses for, 118; on the means of preserving, 306.
Lynn, Mr., portrait and biographical notice of, 156.

M.

Madness, Esquirol on, 435.
Magnet, powers of, in nervous affections, 311: cure of gout with, 459; cure of tic douloureux with, 693.
Magnetism, animal, report to the French Academy of Medicine on 175, 205.
Maitland, Mr. C., on iodic acid, 508.
Mala praxis, trial for alleged, at Derby, 85.
Malformation, of the bladder and abdominal parietes, 280, 797. (*See also* Monstrosities.)
Malyn, Mr. J., autopsy by, after the operation of lithotripsy, 498.
Man, social propensities of, 406.
Mann, Mr. J., on phosphorus in cholera, 755.
Marasmus, case of, 768.
Marylebone Dispensary, election at, 676.
Maxillary artery, external, Velpeau on the ligature of, 554.
Mayo, Professor, quack advertisement of a book by, 793.
M'Keever, Dr. T., on auscultation in pregnancy, 715.
Medical Reform Association, prize proposed by, 605.
Medicine, Operative, analysis of Velpeau's, 389, 471, 485, 549.
Medicines, English patent, prohibition of, in France, 87; on the exhibition of, after operations, 711.
Melanosis of the eye, 422; of the cheek, 423; interesting case of, 470.
Melitagra, description of, 524.
Meningitis, case of, 110.
Menorrhagia, use of ergot of rye in, 27.
Menstruation, diseases of, 286.
Mercury, terrible effects of, on the face, 357; on the iodides of, 660; proto-ioduret of, in secondary syphilis, 204.
Metrorrhagia, use of ergot of rye in, 27.
Machiavelism, medical, 737, 787.
Migraine, Andral on, 2.
Mile-End, election of a surgeon at, 516.
Miliaria, description of, 495.
Milk, mother's, effect of moral excitement on, 523.
Mind, the, Marquis Moscati on, 399; of patients to be watched in great operations, 521.
Ministers, views of, on medical reform, 185.
Monsters, cases of, 499, 314, 620, 732.
Monstrosities, G. St.-Hilaire on, 424, 527.
Morphia, acetate of, test for, 398.
Moscati, Marquis, on the character of Gall, 399. (*See also* Phrenological Society.)
Mucous membrane, effect of exposure on, 280, 707; sensibility of, 810.
Muntz, Dr. F., case of scabby ulceration, cured by vaccination by, 137.
Murder, investigation of a case of, 243.
Murderer, phrenological developments of one, 409.
Muriate of gold in dropsy, 8.
Museum, of the College, filthy state of, 404.
Mustard, adulteration of, 127.
Mycosis, description of, 527.
Myopathy, periodical, following contusion of the thighs, 621.

N.

Nævus, nature of, 568.
Nations, peculiar physiognomies of, 429.
Nature, Mr. White on the powers of, 804.
Naval surgeons, present condition of, 764, 819.
Neck, large tumour of, 514; Velpeau on the arteries of, 553.
Necrosis, abortive, 545.
Nerves, pressure of hydatid cysts on, 161; remarks on the division of, 451.
Nervous system, Sir Charles Bell's discoveries in, 161; confirmation of Sir C. Bell's views of, 323; remarks on the division of, 451; account of Sir C. Bell's discoveries in, 757.
Neuralgia, strychnine in, 76; croton oil externally in, 230; relief of, by a magnet, 312.
News, foreign medical, rapid communication of, in The Lancet, 23.
Nirlus, description of, 494.
Nitrate of silver, injection of, in gonorrhœa and gleet, 134; in erysipelas, 775.
Nitric acid, use of, in a cutaneous disease, 320.
Nose, formation of a new ala to, 385.
Note-taking, rules for, in medical cases, 702.
Nurses, effects of moral excitement on the milk of, 523.

O.

Oak trees, anecdotes of, 348.
Œdema, interesting case of, 63; erysipelatous, 773.
Oil, croton, as an external irritant, 229.
Oil of tar, temporary poisoning with, 598.
Olecranon, fracture of, 798.
Olophlyctis, description of, 493.
Onygosis, nature of, 568.
Operation performed by M. Cloquet during a magnetic sleep, 205.
Operations, false importance of, 102; hospital intruders at, 187, 228.
Ophthalmic Infirmary, operation at, 739; charge of neglect at, 820.
Ophlyctis, description of, 493.
Ophthalmia, blenorrhagic, Dupuytren on, 325.
Opium, Dr. Elliotson's substitution of strychnine for, 31; new substance discovered in, 127; advantage of, in form of enema, 241; relief of obstinate hysteria by, 610.
Oporto, Mr. Lardner on the cholera at, 300.
Os innominatum, fracture of, 796.
O'Shea, Mr. H. A., on the ergot of rye, 388.
Ossification of arteries, production of gangrene by, 749.
Otic ganglion, Mr. Turnam on the discovery of, 687.
Otorrhœa, Mr. Wright on, 117.
Overseers, claims of medical men on, 259, 763.
Owen, Mr. H., on vaccination, 306.

P.

Paget, Dr., essay by, on Baron Alibert's mode of classifying diseases of the skin, 267, 303, 490, 524, 566; on the exposure of mucous membrane to the air, 280.
Pain, dispersion and reproduction of, by a magnet, 311; modes of alleviating, 596.
Pannus, nature of, 568.
Papillæ of the skin, extraordinary elongation of, 147.
Paralysis, with general inflammation, 130; of the lower extremities, 318; case of, 323; of the left foot, 451; of the face; croton oil as an external irritant in, 230; prescriptions for, by a somnambulic patient, 210.
Parish medical contracts, remarks on, 568, 612.
Parliament, medical parties in, 410.
Patella, fractures of, 319, 673, 701; on bony union in fractures of, 769.
Paupers, sick, Mr. Yeatman on the medical care of, 568.
Peacock, Mr. H., on shaving with lime lather, 820.
Pedieuse artery, ligature of, 485.
Pelagra, character of, 647.
Peliosis, nature of, 567.
Penis, malignant disease of, 320; double, instance of, 532; deformity of, 717; anomalous formation of, 797.
Pemphix, description of, 492.
Percussor, the lithotriptic, remarks on, and addition to, 11, 700; controversy on, 725, 767, 788, 795, 820.
Perforation of the humerus, 640; of the abdomen, 147.
Perforations, structural, anomalies of, 529.
Perineal artery, ligature of, 487.
Perineum, lacerated urethra from a fall on, 765.
Periostosis, iodine in, 130.
Peritonitis, post partum, 801.
Perry, Mr. G. J., on vaccination, 118.
Petechia, nature of, 567.
Pharmacopœias, on the manufacture of the, 705.
Pharynx, syphilitic ulceration of, 612.
Phlebitis, idiopathic, 418; before and after erysipelas, 774.
Phlyzacion, description of, 492.
Phosphorus, employment of, in cholera, 694, 755; stimulant powers of, 784.
Phrenology, application of, in the case of a murder, 311; application of, to cases of cerebral injury, 330; Gall's labour for its establishment, 399; state of, in Britain, 407; opinion of Mr. Brodie on, 452; paper of Dr. Milligan against, 462. (*See also* London Phrenological Society.)
Phthisis pulmonalis, analysis of the blood in, 72; new treatment of, 187.
Phymosis, case of, 717.
Physiology, improvement of, by Bell, 757.
Pigments, poisonous, use of, in confectionary, 280.

Pinder, Mr. E. L., on the medicinal powers of phosphorus, 784.
Pistillum of plants, Lindley on, 346.
Placenta and uterus, anatomical relations of, 377; controversy respecting, 113, 142, 339; Dr. Ley on the structure of, 366.
Placentæ, Hunter's preparations of, 403.
Plague, the black, of the 14th century, 151.
Plants, medicinal, evils of cultivating, 424.
Pleuritis, case of, 419.
Pneumathorax, case of, 734.
Pneumonia with erysipelas, 577.
Poisoning, suspected, interesting investigation into a case of, 244; from prussic acid, 257; case of, tried before a "Cour Royale," 298; from oil of tar, 598.
Polypi of the uterus, case of, 148.
Polypus, fatal closure of the glottis by, 100.
Popliteal artery, ligature of, 487.
Porrigo decalvans, remarks on, 279; larvalis, of Willan, 495; of Alibert, 496.
Portraits, medical, Lancet gallery of: introductory notice, 16; portrait of Sir W. Blizard, 17; of Clot Bey, 88; of Mr. Lynn, 156; of Dr. Elliotson, 341; of Sir C. Bell, 756.
Potash, hydriodate of, in removing tumours, 10.
Pregnancy, on the intervals between periods of, 45; on auscultation in, 715.
Prescriptions, hospital, alleged deviation from, 62.
Pressure, trial of, in the treatment of erectile tumours, 168; effect of, on morbid structures, 611.
Prize subject, proposed by the Medical Reform Association, 605.
Prizes, distribution of, at the London University, 289; distribution of, at King's College, 316; distribution of, at the Birmingham Medical School, 417; offer of, at the Westminster Hospital, 702.
Profession, medical, state of, in America, 315.
Profunda artery, ligature of, 488.
Prolapsus ani, Dupuytren's operation for the cure of, 133.
Prostate, iodine in disease of, 672.
Provincial Medical Association, review of papers published by, 393, 460; remarks on some rules of, 470; first anniversary meeting of, 572; Editor's remarks on, 574; speech of Dr. Carrick at the meeting of, 607.
Provincial Medical and Surgical Association, first annual meeting of, 444.
Prurigo, nature of, 567.
Prussic acid. (*Vide* Acid, prussic.)
Psorodes, position of, in Alibert's classification, 567.
Pulse, increase of, 320.
Punctures, Velpeau on, 473.
Purging, after operations for hernia, 251.
Purpura hæmorrhagica, pathology of, 191; cases of, 515, 795.
Pustule, malignant, Dupuytren on, 297.
Pylorus, ulcer of, 829.
Pyrophlyctis, description of, 493.

Q.

Quinine, large doses of, 320.

R.

Rachialgia, Andral on, 33.
Rachitis, distinction of, 320.
Radesyge, description of, 526.
Ramrod, penetration of the abdomen by one, 147.
Rectum, on the functions of, 43; laceration of, 736; advertisement of Mayo on, 795.
Reform, medical, general movement towards, 85, 221; objects of, 184; attempt to delay it, 223; meeting to promote, 227; means of promoting, 248, 255, 577; on the opposition to, 285, 762; remarks on, in the House of Lords, 287; remarks on, 314; meeting at Aberdeen in support of, 355; prospects of, 484; Dr. Carrick's remarks on, 608; notice of some scribblings on, 707; Mr. Gower's remarks on, 722; petitions in favour of, 764.
Reminiscences, professional, by Mr. Gower, 717.
Respiration, old theory of, 354; new theory of, 359.
Rete mucosum, remarks on, 523.
Retina, inflammation of, 327.
Retraction of the lip, 543.
Reviews and analyses of books and journals, viz.:—J. G. St.-Hilaire's Inquiry into the Nature of Hermaphrodism, 48; M. Cavol's *Clinique Medicale*, 83; Hecker's Black Death in the Fourteenth Century, by Babington, 151; Brookes's Diagrammatic Chart of Decompositions, &c., 153; Colquhoun's Translation of the Report made by the Academy of Sciences, Paris, on Animal Magnetism, 175—183, 205—218; Stephens on Obstructed and Inflamed Herniæ, 251; Dublin Medical Journal, May 1833, 240; Annales d'Hygeine, 243, 280; Granville's Illustrations of Abortion and the Diseases of Menstruation, 286; St. Ange on the Circulation in the Fœtus, 313; Lindley's Introduction to Botany, 344; Burnett's Outlines of Botany, 347; Key's Memoir on dividing the Stricture in Strangulated Hernia, outside the Sac, 377; analyses of Velpeau's Operative Medicine, 389, 471, 485, 549; Transactions of the Provincial Medical and Surgical Association, 393, 460; G. St.-Hilaire on monstrosities, 424, 528; Esquirol on Insanity, 435.
Remarks, editorial, on the following subjects:—The fallacies of the "self-supporting" dispensary system, 19; the thousand French cholera medals, 23;

proceedings of the jurors in the *Concours* for the chair of clinical medicine, Paris, 25; the controversy between Drs. Granville and R. Lee, 26; situation of the patient in lithontritic operations, 27; further exposition of the fallacies of the "self-supporting" dispensary system, 51; causes of the sufferings of the poor, 52; national institutions for preserving the public health, 54; splendid donations to the London University Hospital, 83; intention of ministers to introduce a new Anatomy Bill, 84; march of medical reform, 85; petitions against the Apothecaries Act, 85; extraordinary inquest at Horncastle, 86; trial for alleged *mala praxis* at Derby, 86; the ornithological orator of St. Bartholomew's, 86; absurdities in the distribution of the French cholera medals, 87; English quack medicines in France, 87; peculiar epidemic at Paris, 87; further proceedings of the Parisian Concours, 87; case of the Apothecaries Company *versus* Dr. Collins, 120; the Scotch graduates and the "Old Ladies," 121; necessity of union for *total repeal* of the Apothecaries Act, 124; the influenza, its commencement and results, 124; preparation of iodic acid offering a fine opportunity to the ambition of chemists, 125; the new Parisian epidemic disease of the feet, 125; the factory commission, 149; second slight to the surgeons of army and navy, 150; petitions for medical reform, and their discrepancies, 183; views of ministers on medical politics, 185; abandonment of the projected "amendment" of the Anatomy Act, 185; death of Dr. Babington, 186; epidemics, 186; crowding round hospital operation tables, 186; thorough-bred courtiers, 224; plunder of the profession by corporations, 225; want of three great faculties of medicine in Britain and Ireland, 226; purification of the medical laws, 226; abuses of the Concours in France, 243; anatomico-legal and medico-legal investigations, 243, 244; the Royal Society, and its depreciated titles, 246; reform in the Vaccine Board, 246; "Memorial" from Apothecaries Hall to the Secretary of State, 247; requisition to the Council of the College of Surgeons, 248; falsehoods of Roderick, 249; the cholera and influenza, 249; poisonous confectionary, 280; med. jurisprudence—deaths from arsenic and cholera, 281; the *Concours* in France, 282; opposition to changes in medical law, 286; character of attacks on the London University, 308; arrest of pain by the "mineral magnet," 311; phrenology in the detection of murder, 311; proposed monument to Dr. Babington, 349; critical quacks, 350; Apothecaries Act of 1815 and its "Amendment bill," 351; grievances of the profession originating in the Apothecaries Act, 373; and remedy for those grievances, 375; questions proposed by the factory commissioners, 376; reasons for a new medical constitution; state of medical parties in parliament, 409; combination of the College and Hall against the Amendment bill,—defeat of the plotters, 441; orders of the House of Commons to the Colleges of Physicians and Surgeons, 443; cholera in Paris, 444; deputation from the London College of Medicine to Mr. Lamb, 475; supineness of the medical corporations, 476; elections at the Aldersgate-street Dispensary, 477; ridiculous lying accusation in the *Mock Lancet*, 478; Mr. Wardrop's lectures, 479; wise proceedings of the Parliamentary Committee of Inquiry, 508; extraordinary inquiry at Liverpool relative to Dr. Baird, 504, 533, 761; election of Rostan to the chair of Clin. Medicine, Paris; improvement of the *Concours* system, 532; meeting of the hospital-lecturers, 534; cause of the "impostor's" malignancy against the Lond. University, 535; on the hygeienic measures to be adopted against the cholera in London, 543; proposed grant of a charter to the London University, 599; meeting of lecturers at Dr. Hue's, 602; Dr. Carrick's address to the members of the Provincial Association, 603; appointment of a *London* hospital surgeon to the Infirmary at Aylesbury, 603; spirited memorial of the Sheffield medical practitioners, 637; the parliamentary return from the College of Physicians, 637; the eel-backed Sir Henry, 664; objects of a parliamentary inquiry into medical laws, 665; re-enaction of the Cholera Prevention Bill; contagion, 695; parliamentary returns from the colleges, 696; second review of the "self-supporting" dispensary system, 727; unjust ejectmen of a student from a hospital, 731; Parisian Concours, 732; abandonment of the Anatomy tax; insult to the profession at Sheffield, 789; conduct of the governors to medical officers of the Aldersgate-street Dispensary, 790; the certificate-system—Sir A. Cooper, 791; Mr. Dalrymple's offer to the Governors of the Aldersgate-street Dispensary, 821; neglect of a patient at the London Hospital, 825; Mr. Key's dismissal from St. Bartholomew's, 829; Sir A. Carlisle on medical reform, &c. &c., 836.

Rheumatism, use of elaterium in, 10; luxation of the vertebræ simulating, 779.

Ribs, fracture of, 541.

Rice, proportion of nitrogen in, 186.

Roderick, classical knowledge of, 315; untruths of, 249, 478; cry of, at Dr. Hue's,

580; journal of, black-balled, 538; excessive expression of, 836.
Roget, Dr., unworthy evidence of in Cooper v. Wakley, 792.
Roseola, description of, 495.
Rowland, Dr. R., on the use of strychnine, 76.

S.

Scabies, nature of, 567.
Scarlatina, description of, 495; supposed contagion of from exposure to small-pox, 721.
Scapula, fixing of, in shoulder dislocations, 396; fracture of, 732.
Scalds, treatment of, 802.
Scalp, severe wound of, 798.
Scirrhus of the stomach, 128; of the breast, 320; of the mamma, 521.
Schools, notice to, 836.
Scissors, surgical, use of, 471.
Scrofula, effects of, in operations, 518; nature of, 566; remarks on, 643, 706.
Scrotum, diseased, case of, 671.
Scurvy, Alpine, Alibert on, 647.
Sea-sickness, on prussic acid in, 538.
Self-supporting dispensaries. (*See* Dispensaries.)
Serpigines, position of, in Alibert's classification, 524.
Seton, cure of enlarged tongue by, 235; use of in goitre, 685.
Setons under the clavicle in pulmonary disease, 319.
Shampooing apparatus, description of, 306.
Shaving with lime lather, 820.
Sheffield, meeting at, respecting Aldersgate-street Dispensary, 824.
Sheffield Dispensary, memorial to the governors of, 628, 637; treatment of the medical men at, 785, 789.
Sight, illusions of, 437; diseased, case of, 450.
Silica and sulphur, compound of, 127.
Sinclair, Dr. S., case of inguinal aneurysm by, 658.
Sinus, frontal, theory of, 462.
Sketches medico-dramatic, 221, 444.
Skey, Mr., removal of, from the demonstratorship at St. Bartholomew's, 766, 798, 799, 828.
Skin, peculiar affection of, 147; Dr. Paget on Alibert's classification of the diseases of, 267, 303, 490, 524; disease of, 279; caustic application in some diseases of, 320; on the rete mucosum of, 523; Baron Alibert on some diseases of, 613.
Skull, fracture of, 131, 577.
Sleep, magnetic, facts relating to, 205.
Slight, Messrs. H. and J., case by, of poisoning with oil of tar, 598.
Small-pox, prevention of pitting in, 71; occurrence of, after inoculation, 242.
Smelling, disorder of, 437.
Smith, Mr. H. L., letter by, on his "self-supporting" dispensaries, 160.
Smith, Mr. R., case of, inguinal aneurysm, treated by, 566.
Society, Royal, absurd proceedings of, 243;
Society, propensity of man to join, 406.
Soda, chloride of, in burns and scalds, 45.
Somnambulism, magnetic, extraordinary accounts of, 207.
Sonnerberg, Professor, case by, of periodical myopathy, following contusion of the thighs, 621.
Sphincter ani, weakened action of, 133.
Spiloplaxia, description of, 525.
Spina bifida in the adult, variety of, 466; case of recovery from, 469.
Spine, affection of, 33, 318, 830.
St. Bartholomew's Hospital (*see* Hospital Reports); prizes at, 292; removal of Mr. Skey at, 766, 798, 799, 828.
St. George's Hospital. (*See* Hospital Reports.)
St. Thomas's Hospital (*see* Hospital Reports); complaint from the theatre of, 186; refusal to electrify at, 701.
St. James's Dispensary, election at, 452.
Stamp act, oppression under, 483.
Stanley, Mr., removal of Mr. Skey, by, 766, 798, 799.
Staphyloraphy, operation of, 13.
Stature, varieties of, 429.
Stephens, Mr. H., on hernia, review of, 249; opinions of, on adhesions of the bowels, 381; on venous injection and mercury in cholera, 657.
Stephenson, Mr. T., letter from, 676. (*See also* 612.)
Stethoscope, on the use of, 457; employment of, in detecting fœtal life, 715.
Stimulants, remarks on, 721.
Stomach, scirrhus of, 128; new instrument for emptying, 240; effects of tea drinking on, 47, 274; gurgling in, flatulency of, 242.
Strictures, care of, 673.
Strumæ, position of, in Alibert's classification, 566.
Strychnine, substituted for opium in diabetes mellitus, 28; Dr. Rowland on, 76.
Student, medical, inquest on one, 479; unjust expulsion of one from a hospital, 731.
Studies, surgical, Mr. Wardrop on, 456.
Stumps, Dupuytren on the mode of dressing, 618.
Subclavian artery, Velpeau on the ligature of, 552; aneurysm of, 806; ligature of, 807.
Subjects, lecturers' profits on, 708, 800, 826.
Sulphur and silica, compound of, 127.
Surgery, English traders in, 755; literature of, 389; Mr. Wardrop on the practice of, 453; ophthalmic, in England, sketch of, 750.
Sutures, Velpeau on, 473.
Syncope following tea-drinking, 276; utility of, during and after operations, 649.

Syphilis, secondary, proto-ioduret of mercury in, 204; extraordinary ravages of, on the face, 357; varieties of, 527; case of, 612.

T.

Tar, oil of, poisoning with, 598.
Taste, disordered state of, 437.
Tax on medical students for the Anatomy Bill, 84; abandonment of, 789.
Tea-drinking, discussion on the effects of, 47; paper on, 274.
Teeth, remarks on the, 12, 46, 236.
Temperaments, Mr. Wardrop on the effects of, in operations, 520.
Temporal artery, Velpeau on the ligature of, 553.
Teratology, history of, 425.
Test-tubes, glass, non-existence of arsenic in, 376.
Testicle, absorption of, 669.
Tetanus, Mr. Gower on, 719.
Thigh, Dupuytren on amputation of, 588; on the amputation of, at the hip-joint, 590.
Thighs, contusion of, followed by periodical myopathy, 621.
Thompson, Dr. R., on enlargement of the tongue cured by seton, 235.
Thompson, Dr., on melanosis, 422.
Throat, cut, Mr. Brodie on, 32; case of, 448; syphilitic ulceration of, 612.
Thurnam, Mr. J., on the otic ganglion, 687.
Thyroid, arteries, Velpeau on the ligature of, 554; gland, sloughing of, 704.
Tibia, compound fracture of, 539; and fibula, fracture of, 767; disease of, 522.
Tibial artery, anterior, ligature of, 485; posterior, 436.
Tic douloureux, relief of, by the magnet, 312, 693.
Tineæ, position of, in Alibert's classification, 495.
Tissues, erectile, Dupuytren on, 165.
Toes, Dupuytren on amputation of, 589; twelve, in a child, 673.
Tongue, aneurysmal tumour of, removed by mercury, 9; enlargement and abscess of, cured by seton, 235.
Tonsils, use of curved scissors in the removal of, 93.
Toogood, Mr. J., on fixing the scapula in dislocation of the humerus, 396.
Tooth-ach, removal of, by the magnet, 313.
Torsion of arteries, Dupuytren on, 617.
Trachea, on foreign growths and bodies in, 97.
Tracheotomy, difficulty of, in the living subject, 32; Dupuytren on some cases of, 98; successful employment of, in guttural angina, 101; remarks on, 801; successful employment of, in croup, 811.
Trail, Professor, case of hydrocephalus by, 394.
Travelling, benefit of, to insane patients, 440.
Trichonia, description of, 496.
Tubes, chemical test, arsenic in, 376.
Tumour, aneurysmal, of the tongue, removal of by mercury, 9; aneurysmal, ligature on the distal side of, 421; of the gum, operation for removal of a, 94; bursal, of the groin, 317; fatty, removal of, 450; on the spine, operation for, 466; of the neck, operation for, 514; of the head, excision of, 519; sarcomatous of the neck, 519; enormous, of the mamma, 653; muscular, 672.
Tumours, removal of, by friction, with iodine, 10; erectile, treatment of, 166; erectile, of the lower lip, 168, 170; of the foot and thigh, 169; of the scalp and neck, 170; of the face and head, 171; scrotal, 671; fungous, on the os calcis, 671; melanotic, removal of, 422; treatment of with iodine, 450.
Tunica vaginalis, hydrocele of, 164; change of structure in, 684.
Tylosis, nature of, 568.
Tyrrell, Mr., sketch of, as an oculist, 750.

U.

Ulcer of the face, 321; of the cornea, 514; of pylorus, 829.
Ulceration, phagedenic, 674; from erectile tumours, 169; syphilitic, 707.
Ulcerations, scabby, cured by vaccination, 137.
Ulcers, irritable, black wash in, 769.
Ulna, luxations of the inferior extremity of, 748.
Umbilicus, discharge of urine by, 529.
University of London, distribution of medals at, 289; slanders against, 309; proposed hospital of, 310; cause of Roderick's attacks on, 535; anticipated charter of, 574, 599, 604, 676; meeting of hospital lecturers, concerning the proposed charter of, 602; on the name of, 676; subscriptions to, and importance of its hospital, 84, 309.
Urea, contained in vomited fluid, 704.
Ureters, exposure of the extremities of, 797.
Urethra, introduction of foreign bodies into, 110; congenital contraction of the orifice of, 321; thickened membrane of, 450; laceration of, 765.
Urine, changes of, in diabetes mellitus, 28; retention of, from imperforate hymen, 395; suppression of, 450; mode of noting the state of, 462; distillation of, 797.
Uterine polypi, case of, 148.
Uterus, Mr. Weddell on, 42; and placenta, anatomical relations of, 77, 403; and placenta, Dr. Lee on the connexion between, 113; and placenta, controversy respecting the union of, 142, 366; effect of an emetic on, 724.

V.

Vaccina, description of, 494.
Vaccination, expenses of, in England and France, 92; preference of points to glasses in, 118, 306; as a cure of scabby ulcerations, 137.
Vaccine board, reform in, 246.
Varicella, description of, 494.
Varicocele and paraplegia, case of, 669.
Variola, description of, 494.
Varus, description of, 524.
Veins, curious affection of, 127; varicose, case of, 707.
Veitch, Dr. A., on the Horncastle inquest, 287.
Velpeau, M., remarks on the works and merits of, 389.
——— introduction to an analysis of his "Operative Medicine," 391.
——— on lithotrity, 392.
——— on surgical cut divisions, 471.
——— on surgical instruments, 471.
——— on punctures and sutures, 473.
——— on the ligature of arteries, with anatomical remarks, 485.
——— on the pedieuse artery, 485.
——— on the posterior tibial artery, 486.
——— on the perineal artery, 487.
——— on the popliteal artery, 487.
——— on the femoral artery, 488.
——— on the circumflex and profunda arteries, 489.
——— on the external iliac artery, 489.
——— on the internal and common iliac arteries, and the abdominal aorta, 490.
——— on the arteries of the hand and fore-arm, 549.
——— on the arteries of the elbow, 550.
——— on the brachial and axillary arteries, 551.
——— on the subclavian artery, 552.
——— on the temporal and facial arteries, 553.
——— on the arteries of the neck, 5.
——— on the common carotid artery, 553.
——— on the external maxillary artery, 554.
——— on the thyroid arteries, upper and inferior, 554.
——— on the brachio-cephalic artery, or innominata, 554.
Verruca, nature of, 568.
Vertebræ, cervical, fracture of, 44; Mr. Brodie on disease of, 321; Baron Dupuytren on accidents to, and on diseases simulating them, 776; laceration of ligaments connected with, 777.
Veterinary medicine, Professor Youatt's lectures on:—(When the supplements containing these are completed, an index to their contents will be published.)
Vision, magnetic, with the eyes closed, 206.
Vomiting of urinal fluid, 704.

W.

Wakefield, medical meeting at, 195; memorial from, in favour of the Apothecaries Act, 413.
Walker, Mr. B., communications from, 195, 413.
Walther, Professor, on English eye-surgery, 750.
Ward, Mr. F., on fractured patella, 769.
Wardrop, Mr., communication from, 421.
——— surgical lectures by, viz.:—
——— on the objects of surgery, the duties of surgeons, and medical operations, 453.
——— on the causes of danger in operations, 517.
——— on operations on scrofulous and gouty persons, 518.
——— on the differences of temperament in operations, 520.
——— on the effects of age in operations, 522.
——— on the treatment proper previous to operations, 591.
——— on the influence of atmosphere, seasons, and time of day, on operations, 594.
——— on the mode of conducting operations, 594.
——— on the instruments to be used in operations, 595.
——— on the assistance necessary in operations, 595.
——— on the modes of alleviating pain in operations, 596.
——— on the utility of syncope in operations, 649.
——— on inflammatory symptoms after operations, 649.
——— on hemorrhage from wounds in operations, 650.
——— on the effect of venesection in operations, 651.
——— on secondary hemorrhage in operations, 652.
——— on the treatment of the wound in operations, 653.
——— on diet after operations, 654.
——— on the pernicious results of improper food after operations, 654.
——— on the evil effects of stimulating drinks after operations, 656.
——— on the evils of wine and cordials in operations, 709.
——— on the necessity of quiet after operations, 709.
——— on the salutary effect of some degree of moral excitement after operations, 710.
——— on the exhibition of medicines after operations, 711.
——— on the consecutive treatment of the wound in operations in different constitutions, 712.
——— excellence of the lectures of, 479.

Wardrop, note on the lectures of, 740.
Wash, the black, use of in irritable ulcers, 769.
Water, hygrometric, contained in flour, 126.
Watkins, Mr., note from, 580.
Weatherill, Dr. T., case by, of entire destruction of the face by syphilis and mercury, 357; on malignant cholera, 388.
Weddell, Mr. T., on the uterus, 42.
Weiss, Mr. J., on the invention of the percussor, 785, 820, 836.
Westminster Hospital, elections at, 382, 412, 415, 482, 548, 787. (*See also* Hospital Reports.)
Westminster Medical Society; Reports of proceedings and discussions at:—Improvements in Mr. Costello's percussor, 11; extraction and treatment of teeth, 12, 46; staphyloraphy, 15; functions of the rectum, 43; fracture of the cervical vertebræ, 44; intervals occurring between childbearing; treatment of burns, scalds, &c., by chloride of soda, 45; singular affection of the skin, 146; rarity of bayonet wounds, 147; the influenza, 147; the overworking of children in factories, 220.
Whitlaw, Mr., on the lobelia inflata, 132.
Willan, errors in his cutaneous system, 271.
Williams, Mr. J., note respecting, 388, 420.
Williams, Dr. J. C., factory commission questions addressed to, 414.
Wilson, Mr. J., on the anti-stimulant treatment of cholera, 656.
Wine, effects of, in operations, 649, 709.
Winslow, Mr. F., on sea-sickness, 538.
Woollett, Mr. M. S. J., on Roderick's classical ignorance, 315.
Wright, Mr. W., on deafness in the English, 82; on otorrhœa, 117; on foreign bodies in the ear, 154, 189, 203.
Wright, Dr. T. G., on the cause of cholera, 112.

Y.

Yeatman, Mr. J. C., on the necessity of parliamentary interference respecting the medical care of sick paupers, 568.
Youatt, Professor, notice of the lectures of, 644. (*See* Veterinary Medicine.)

Z.

Zoster, description of, 492.
